Description

Torqit performance modules unleash the power, torque and efficiency that are lost through factory programming of your vehicles on-board engine control units. These modules are designed to be simply plugged into existing factory components. For your model, make and engine type, installation is seamless and as easy as the module is simply plugged into existing factory components.

APPLICATIONS:

Great Wall V200 2.0L Turbo diesel 04/2011-On

RESULTS:

~~KW Standard 105KW~~
~~KW Enhanced 133KW~~
