Description

The Redhorse Performance 6000 Series Push Lock Hose Ends are CNC machined from 6061, T6 Aluminum, providing superior thread strength and leak proof performance. RHP's custom designed hose nipples allow quick and easy assembly. RHP's unique Aluminum collars cover the cut end of the hose, to provide a clean looking finish. RHP's exclusive hand polishing, color consistent anodizing and unique pressure testing provide the final touch of quality and protection.

This fitting is suitable for turbochargers ranging from T25, all the way through to T04Z. **Large frame turbochargers (GT/X 40 upwards) require at least a 13mm (1/2") hosetail.**
